

Who is using AbsoluteProof and what do they have to say?

**Kendall**  
PRINTING COMPANY

The complete marketing  
fulfillment solution

Design Print Bind Package Mail

**Kendall  
Printing  
Company**

Kendall Printing introduces **One Pass Printing** with the new Heidelberg Speedmaster 102-10P. The Speedmaster has the revolutionary capability to produce 10-color prints in one pass, printing and coating both sides simultaneously.

And that's just the beginning.

Only one press in the Western United States has these capabilities: ours.

With this technology, Kendall is making multiple press passes - and the higher costs and production times associated with them - things of the past.

In a world where we're bombarded with hundreds of images a minute, an initial impression may be your only impression. Our **new technology**, combined with **twenty years of experience** in **marketing fulfillment**, to make your first impression a stunning one.

#### **About Kendall**

We operate as an all-in-one resource to support a variety of on-going printing and marketing fulfillment needs. Working with clients worldwide on jobs of all **scopes and sizes**, we offer on-staff **personal project consultants** to create target budgets and guidelines for entrepreneurs, businesses/corporations, non-profits, schools and self-publishers.

"We were so pleased with the job Kendall Printing Company did on the photos for this year's book for the Nature Conservancy in Colorado. The pictures were stellar, and I feel that Kendall reached a whole new level with this year's edition. It is a real coffee table piece!"

— **Audrey Wolk**, Director of Marketing for the Nature Conservancy in Colorado, Boulder, CO

With our purchase of the new Absolute Proofing system here, press-checks are becoming a thing of the pass. Being able to have a true 200 line 2400 dpi proof is simply awesome. Using the same file that I use for plating, guarantees that my proofs are accurate, with NO re-interpretation of the information. More importantly, my toughest customers are now able to sign off on color with confidence. Absolute Proof couple with the Proof to Pass system ensures, that, what you see on the proof is what you see on the final product. Everyone is able to build a pretty proof, but the Absolute Proof delivers on what you see in the proof is what you get on press!

Thanks  
Chris Johnston
